

GL60 ZOOM Spotlight

The GL60 ZOOM Spotlight has a new zoom function based on the GL60 fixed focus version. The rated power is up to 65W, the illumination light angle can be smoothly adjusted between 7-25 degrees, and the spotlight and floodlight can be flexibly dispatched. The farthest illumination distance can reach 200 meters, providing a more flexible and convenient aerial lighting effect for UAV night operations. Through the DJI SkyPort V2.0 interface, it can be directly mounted on the DJI M200V2 series and M300 RTK of drones to meet night inspections, investigations and evidence collection, warning drive away, direction indication, power line patrol, search and rescue and other night operations demand.

High Lumen LED Linear Dimming

Rated power up to 65W
Effective irradiation up to 200 meters
Flexible brightness control

Flexible Zoom Auto Follow

Fresnel lens optical zoom structure
7-25 degree illumination angle
Follow camera zoom and rotation
Where the camera is

Various Modes, Target Tracking

With strong light flash mode
Can be spotlighted/flooded
Lockable to capture moving objects
Continuous irradiation tracking

Waterproof and Dustproof

Fanless fully sealed design
Better waterproof and dustproof performance
